PREFACE

This Abstract presents the first systematic and co-ordinated effort to pool together all the available economic and statistical information relating to the New State of Madhya Pradesh in one handy reference book. Such information is urgently needed not only for the purpose of formulating suitable schemes for administrative and financial integration of the constituent units, but also for systematic appraisal and quantitative assessment of the needs and resources of the New State. Such assessment is necessary both for the purpose of developmental planning and effective functioning of the administrative machinery. It is with a view to meet this urgent need that all the available statistical information relating to the New State of Madhya Pradesh has been pooled together, co-ordinated and arranged under appropriate heads. The publication is intended to serve as a handy source of reference which can give in a synoptic form all essential factual and statistical information relating to the socio-economic life of the people living in this region.
